Simultaneous Joint Replacement

July 2022 V1.0

Version Number	V1.0
Approved By	NHS Hertfordshire & West Essex Integrated Care Board.
Date Approved	1st July 2022
Responsible Director	Medical Director
Directorate	Clinical
Staff Audience	HWE EBI and IFR Team, Primary and Secondary Care Clinicians, Provider Clinical Funding Teams
Publication Date	1st July 2022
Review Date	1st July 2024
Description	Policy for local Evidence Based Interventions procedure
Superseded Documents (if applicable)	Hertfordshire CCG (Priorities Forum) – Simultaneous Joint Replacement

Document Owner: Medical Directorate	Prepared by: Associate Medical Director for Planned Care and Prioritisation	First Published: 1 st July 2022
Document number:	Approval date: 1 st July 2022	Version number: 1.0
Status: Approved	Next review date: 1 st July 2024

Document Owner: Medical Directorate	Prepared by: Associate Medical Director for Planned Care and Prioritisation	First Published: 1 st July 2022
Document number:	Approval date: 1 st July 2022	Version number: 1.0
Status: Approved	Next review date: 1 st July 2024	

The policy should include a contents page, as set out below, and be structured around all of the headings shown (although not necessarily in the same order)

CONTENTS

Section		Page
1.	Introduction An overview of the importance of the policy	4
2.	Purpose The rationale for the development of the policy; objectives and intended outcomes of the process / system described	4
3.	Content The key points of the policy should be written in a clear, concise manner, so as to be easily understood and correctly interpreted	4
4.	References	4 & 5

Appendices:

Each appendix will be numbered to follow on from the policy document.

Status: Approved	Next review date: 1 st July 2024	

Policy: Simultaneous Joint Replacement

The Hertfordshire & West Essex ICB will not routinely fund any of the following joint replacement procedures

- simultaneous hip replacement i.e. replacing both hips at the same time
- simultaneous knee replacement i.e. replacing both knees at the same time
- simultaneous shoulder joint replacement

This does not affect staged joint replacement as long as the patient meets the relevant criteria for each procedure prior to surgical procedure.

Exceptionality to the above will be considered, as long as it can be evidenced that simultaneous replacement of joints will not affect the rehabilitation of the patient: evidence will need to be provided as part of an IFR application.

Summary of Evidence

A literature search was undertaken by Castlepoint and Rochford CCG

Whilst there may be an advantage that the surgery is undertaken in one go, it does pose greater risks for example surgery is therefore longer which alone can increase the risk of complications. Recovery and rehabilitation time may be increased when having simultaneous joint replacements and therefore this can place a greater demand on the body. It is suggested that staged joint replacement poses less risk to older patients and patients with heart conditions whilst also reducing the length of time patients are in hospital. The majority of patients having total joint replacements are over the age of 65 years and whilst having stage joint replacements will mean having two episodes of surgery the main advantage is that it reduces risks of complications and recovery time.

Total hip arthroplasty (THA) is a highly successful orthopaedic surgical procedure. However, controversies still exist between conducting 1- or 2-stage bilateral THA as studies undertaken have selected their patient cohort which does not conclusively provide evidence for reducing risks from the operation which the older patient could be more susceptible.

There were 13 studies with 17,762 patients who underwent 1-stage bilateral THA and 46,147 patients who underwent 2-stage bilateral THA. However, this study does not encourage performing 1-stage over 2-stage bilateral THA. Higher evidence level studies are necessary for further analysis.

Human Rights and Equalities Legislation has been considered in the development of this guidance

Patients who are not eligible for treatment under this policy may be considered on an individual basis where their GP or consultant believes exceptional circumstances exist that warrant deviation from the rule of this policy. Individual cases will be reviewed as per the ICB policy.
